## Professional Summary

---

Adaptable computer science student with a cybersecurity focus and hands-on SOC analyst experience, skilled in incident response, security monitoring, and technical troubleshooting. Strong foundation in programming, scripting, and system administration, with proven teamwork and communication abilities. Eager to contribute technical expertise and problem-solving skills to dynamic IT or cybersecurity roles.

## Work Experience

---

### **SOC Analyst (Student)**

ORTSOC - Oregon State University-Corvallis, OR

September 2025 to Present

- Monitored and analyzed security telemetry using a centralized log and alerting platform to identify potential security incidents
- Investigated suspicious activity, including authentication anomalies and network-related events, and documented findings and escalation decisions
- Reviewed detection logic and alert behavior to identify false positives and improve alert quality
- Collaborated with network security monitoring and threat intelligence teams to align detections with emerging threats
- Participated in structured incident response workflows, including triage, analysis, and reporting, supporting mission-driven security operations
- Maintained clear documentation and handoffs using tickets and internal communication channels to ensure effective teamwork
- Communicated technical findings clearly to team members and contributed to a collaborative, solutions-oriented environment

## Education

---

### **Computer Science - Cybersecurity Option (Bachelor's degree)**

Oregon State University-Corvallis, OR

September 2024 to May 2026

## Skills

---

- Cybersecurity
- Incident response
- SIEM
- System administration
- Network protocols
- Computer networking

- Scripting
- Python
- Vulnerability management
- Information security
- IT operations
- Windows
- SQL
- PowerShell
- System security
